Digital Logic System

Assignment 5

1. Explain ALU with eight different operations.
2. What is processor organization?
3. Design a 4-bit ALU and explain its operation.
4. Explain register and memory organization in computer system briefly.
5. Explain bus organization with necessary block diagram.
6. Explain accumulator register.
7. Explain about RAM organization.
8. What is status register? Explain with necessary block diagram.
